The Fundamentals of Travel Planning

Overview
Whilst development of travel plans has become second nature across the UK over the past two decades, it is important to get back to basics with how travel plans should be developed and delivered. As professionals, many of us get involved in some aspects of the travel planning process, but understanding a clear and easy process from beginning to end can really help with planning and delivery.

This course focuses specifically on the successful elements needed to construct, deliver and monitor travel plans and will be helpful for those involved in operations, logistics, HR, property and planning as well as those employed in more conventional sustainable transport roles. Packed with helpful tips and case-studies this one-day course is a must for anyone wishing to develop and grow their skills in travel planning.
